## SUMMARY

An enthusiastic and aspiring professional, eager to embark on a dynamic career in the tech industry. Equipped with a strong academic foundation and a keen eye for innovation. With a humble and continuous learning mindset, I am driven by a desire to become a versatile 'jack of all trades' in the field, adept across various technologies and disciplines. Ready to contribute fresh perspectives and adaptable strategies, I am committed to growing alongside forward-thinking teams and making meaningful impacts.

## EXPERIENCE

- **DIGITAL MARKETING INTERN VENTURE LAB (THAPAR UNIV)**
  - Speaker Relations
  - Managing Linkedin Account
  - Business Marketing and Marketing Support

## SKILLS

- Languages: **C , C++ , Python , Solidity , R , HTML , CSS**
- Databases: **SQL, OracleSQL**
- Frameworks and Libraries : **Tailwind CSS , Hardhat, Pytorch, Tkinter, Pyttsx3 , Seaborn, Matplotlib , Tensor Flow**
- Source Control / Editor : **Git , Github , VS Code, Remix**
- Others: **Workflows , AI/ML , Deep Learning , NLP , Data Analytics , Data Processing , Computer Networks , MS Excel , Operating Systems , Data Structures , Canva , Financial Markets**

## PROJECTS

- **MAJOR PROJECTS**
  - 1. Decentralized Crowdfunding | Jan 2024**

A blockchain crowdfunding platform is a digital platform that leverages blockchain technology and the principles of Web3 to facilitate crowdfunding campaigns. This innovative approach to crowdfunding offers several advantages over traditional crowdfunding platforms.
- **MINOR PROJECTS**
  - 1. Speech to Text and Text to speech using PYTHON | Apr 2023**

The application uses various libraries and modules such as tkinter for the graphical user interface, speech\_recognition for speech recognition, pyttsx3 for text-to-speech conversion, and win32com.client for Windows API integration
  - 2. E-commerce Shopper Purchase Prediction Analysis using ML | Oct 2023**

This project seeks to address this pivotal marketing challenge through the implementation of machine learning algorithms. Specifically, our focus is on developing a predictive model capable of determining whether a customer visiting an online shopping website will culminate their visit with a purchase.

## EDUCATION

- |   |                                   |
|---|-----------------------------------|
| • <b>B.E in Computer Engineering   Thapar Institute of Engineering and Technology, Patiala, Punjab   2021-Ongoing</b> | CGPA<br>(up to 6th semester)-7.84 |
| • <b>St. Xavier's International School, Patiala   12th Board (CBSE) 2021</b>  | Percentage-91.8%                  |
| • <b>LCIT Public School   10th Board (CBSE) 2019</b>  | Percentage-89.8%                  |

## CERTIFICATIONS and AWARDS

- DATA STRUCTURES AND ALGORITHMS {CODE HELP}
- COURSERA CERTIFICATIONS IN DATA SCIENCE AND NLP {Upto 10 Certifications}
- Winner WOLF OF DALAL STREET 7.0
